

WFTDA COVID-19

Guidelines to Return to Roller Derby

The WFTDA COVID-19 Guidelines to Return to Roller Derby document was created as a flexible plan for leagues who voluntarily wish to return to playing the sport of roller derby in areas that may be allowed to do so per their local government and per the recommendations herein.

Additionally, these WFTDA guidelines are recommendations that apply for any geographic area in which a skater, coach or official lives and participates; we recognize that many participants live and skate in different regions. In these cases, the criteria must be met for both regions.

Although our WFTDA guidelines may be more restrictive than many national, state, or city recommendations, they are not meant to take the place of any local or federal government guidelines that may ask you to prohibit game play altogether. In these instances, the WFTDA recommends strict compliance with regional restrictions and orders you may be subject to, as safety is our primary concern.

WFTDA set these guidelines to slowly return to roller derby activity in a tiered format that takes into account the impact of the virus and the availability of medical treatments to combat the virus. It carefully steps up activity, travel, event size and recommendations for audiences based on the impact of the virus and the availability of medical treatments:

- from non-contact to full-contact;
- from league activity only to local to regional to global competition;
- from small group participation to multi-team events;
- from no audiences to small audiences to large events

Leagues must start at the Baseline Conditions, wait 14 days, and then start at TIER ONE. Leagues may not start at later tiers or skip tiers. Each tier should be completed for at least 14 days before a promotion is assessed.

Important Concepts in This Document

League - A league for the purpose of this document is defined as any group of people - including juniors and recreational participants - who normally play and share space together. Even if multiple leagues practice together, when indicated in the Activity Recommendations for the initial tiers in the ladder, participants should be assigned to smaller groups or lineups.

Multiple leagues who utilize the same facility should, whenever possible, use the facility on different days/times in order to facilitate better contact tracing should an exposure occur.

Local/Locality - The geographic areas in which your league is located and all league's participants reside and work. Defining "local" is important for your league in order to be able to assess the presence of the virus in your community, and it may include more than just your town if league members travel to play from different areas. If members travel from a long distance to your events, and/or require the use of public transportation, you should also consider the impact of the virus on areas where they may stop and/or mode of transportation.

Community-spread - The spread of the virus within your local community (as described in Local/Locality above). When assessing league activity, it is first important to understand how the virus is impacting your league simply by the activities of local people congregating together.

Travel-spread - The spread of the virus due to travel to another locality, or from someone from another locality coming in. This is a risk that is added once the league starts traveling to other localities or inviting participants from other localities in.

In addition to assessing community spread vs. travel spread, it is also important to assess the daily impact of movement of people in your community's everyday life. It is recommended that leagues in high-density or high-traffic areas take extra care to assess their government policies and economic activities and the impact on the spread of the virus when determining how to proceed with roller derby activities.

Region - The geographic area in which your league participates and considers to be short-distance or regional travel. This is important if your league is in an area with multiple states, provinces or countries within close travel proximity and considers those other geographic areas as being within your region. It is important to hold off on international travel until the first step of competing domestically within your region is completed for at least a 14-day interval.

WFTDA Statement on Audiences and Roller Derby

The WFTDA believes that re-engaging in the sport is a personal and difficult choice for leagues, especially those hardest hit by COVID-19. The guidelines in this plan are meant specifically and solely for participants of the sport, and we have paused our WFTDA competitive pathways in an effort to de-emphasize in-person fan engagement.

While we agree that some leagues may be ready to attempt a return, exposing non-participants to potential risk of infection for the benefit of our sport is not acceptable. Until there are tangible interventions, including vaccines, meaningful therapeutics, widespread testing of cases and/or antibodies, community immunity, or other factors making audiences ethically viable, we do not recommend your league welcome in-person audiences at this time.

However, we do recognize that the Return-to-Play Ladder can help us determine the readiness of WFTDA roller derby to take on this important shift to public events again, and we are working on developing broadcast solutions to help leagues stay engaged with their communities and roller derby fans worldwide.

WFTDA COVID-19: Guidelines for Officials, Photographers, Announcers and Other Volunteers

Affiliated Officials: The WFTDA relies on officials to ensure that roller derby is facilitated safely. If you are an affiliated official, please follow the guide along with your designated league.

Announcers, Photographers, and Volunteers: We value the contributions of our biggest supporters, and advise that community members affiliated with a league follow that league's progression on the ladder.

If you are an **unaffiliated official, announcer, photographer, or volunteer** who works with multiple leagues, we recommend these guidelines:

- Adhere to the WFTDA Infection Control Protocols
- Adhere to pre-activity COVID-19 symptom checks; if you show symptoms of COVID-19, alert any league you are in contact with and discontinue activity
- Your area of residence must also meet Baseline Guidelines to begin activities
- If unaffiliated, choose one league for temporary ladder integration; contact that league to discuss their readiness.
 - » Skating officials may participate as early as TIER ONE for non-contact exercise
 - » Non-skating officials may participate at TIER THREE
 - » Announcers, photographers, and volunteers may participate starting at TIER FOUR
- Once attending a league's activities, the WFTDA recommends that participants:
 - » Wait 14 days until the last day of your participation with one league before attending a different league's activities
 - » If invited to an interleague event, both leagues must be at TIER FOUR or higher
 - » If any league you work with steps off the ladder due to a positive case, you must follow that protocol

BASIC PRACTICE HYGIENE GUIDELINES

- Do not attend events when you are sick or suspect you are sick. COVID-19 symptoms are outlined on this page.
- Travel individually to and from practice unless participants live together
- Wash or disinfect gear after every use
- Do not share equipment, water bottles, etc.
- Limit outside visitors
- Allow the use of masks and gloves
- Follow disinfecting protocol of their facilities regularly, as outlined in the WFTDA Infection Control Guide

COVID-19 SYMPTOMS

COVID-19 presents with a wide range of symptoms reported - from mild symptoms to severe illness. Please discuss these symptoms with your league members and ensure that members feel comfortable reporting any of the following symptoms to league management. Symptoms may appear 2-14 days after exposure to the virus and include but are not limited to:

- Fever (100.4F/38C)
- Cough
- Shortness of breath or difficulty breathing
- Chills
- Repeated shaking with chills
- Muscle pain
- Headache
- Sore throat
- New loss of taste or smell

If you develop any of these symptoms, get medical attention immediately:

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion or inability to rouse
- Bluish lips or face

GETTING GEARED UP: How Does My League Know We Are Ready?

Has your league identified a Risk Coordinator to manage risk assessment and wellness for your league? The job description may be found in the WFTDA Risk Management Guidelines. This person, along with your Coaching and Training committee, will be essential to helping your league leadership assess steps towards return to play.

Has your leadership read the WFTDA Infection Control Guidance for Leagues and made them available to your league? This document provides best practices for hygiene to avoid the spread of contagious diseases in your league.

Has your leadership read the Recommendations for Return to Full-Contact Skating and made them available to your league? This document provides best training practices for return to play from any absence from roller derby, which includes recommended off-skates activity before attempting on-skates exercise.

Do you know where to find the most accurate and updated information on COVID-19 in your locality, region and country? This will be essential to know when your league is legally allowed to resume activity. The Risk Coordinator should put together league-specific information on where to find this information to facilitate league knowledge and participation in this process. (See our online FAQs for resources.)

When your league is GEARED UP you are ready to advance to BASELINE CONDITIONS »

BASELINE CONDITIONS **Required For a League to Begin TIER ONE:**

Your local government must have official regulations or guidelines on re-socialization that:

- **Remove stay-at-home orders and proximity restrictions;**
- **Allow for public congregations of at least 50; and**
- **Do not prevent your league from congregating and recreating with non-contact.**

Fully-functioning public transportation services in your locality (as in, not limited by government assessment of essential services).

The WFTDA also recommends **familiarizing yourself with the following general metrics** that should maintain overall downward trends for 14 days or more in your region, so that you will be ready to plan for successful meeting of Baseline Conditions:

- **Hospital admissions,**
- **Percent of positive tests, or**
- **COVID-19 related deaths**

Please make sure you **contact your local department or ministry of health to determine the best sources for current data**. If your league does not have access to the information above and you are unsure if you meet Baseline Conditions contact WFTDA for consultation.

BASELINE CONDITIONS **Required For a League to Begin TIER ONE** continued

You have waited until your league's locality has reported these metrics: The WFTDA is utilizing 5 in 10,000 positive cases over 14 days (50 in 100,000) as our marker for ideal downward trends of new active COVID cases. You can calculate this from the total number of new cases reported per the following guideline:

Population of Your League's Locality	Daily Active COVID-19 Cases
0-9,999	0 cases
10,000-99,999	Maximum of 5 cases
100,000+	Maximum of 50 cases (calculate per below example)

How to Calculate the maximum number of new active cases for a large city/high-density population area:

1. Divide the population of your locality by 100,000. For example, the population of Philadelphia is reported as 1,584,000 people. $1,584,000 \div 100,000 = 15.84$. This is your population multiplier.
2. Multiply this population multiplier by 50, which is the maximum number of new active cases allowable. $15.84 \times 50 = 792$ cases over 14 days.
3. Divide the maximum number of cases allowable over 14 days by 14 to find the maximum number allowable per day. $792 \div 14 = 56.5$ new active cases reported per day by the City of Philadelphia.

NOTE: If your league draws participants from more than one town/city, your locality needs to include all the areas where participants live and work. If the numbers are higher than those listed in the table, then you should not start to play roller derby until all areas are at an allowable level.

When ALL OF THE BASELINE CONDITIONS have been met your league is ready to advance to TIER ONE »

If any of these conditions have not been met in your area, we do not recommend attempting to return to play, and advise you to wait before starting the return-to-derby process.

SECTION ONE: League-only Graduated Return to Activities

RETURN-TO-DERBY LADDER

TIER ONE

TIER ONE: League Return with No Contact

These are localized recommendations that apply for any locality in which a skater or official lives and participates. This tier allows for leagues to meet again in small groups for any non-contact activities.

TIER ONE: Policy Recommendations

- **Suspend all league attendance policies;**
- Encourage **regular symptom checks at home**, including temperature checks before practice or activities (see COVID-19 symptoms);
- **Allow the use of cloth masks and gloves;**
- **Create and encourage a judgment-free, self-reporting structure** that includes mandatory isolation from in-person league activities or events for 14 days, or longer as advised by a medical professional, for participants who
 - » report any COVID-19 symptoms, or
 - » return from travel to areas with high-risk for COVID-19

TIER ONE: Activity Recommendations

- **To track any potential exposure, limit practices to assigned, smaller groups of skaters and officials, where participants do not rotate or mix.**
 - » You may assign groups by teams or lines, or people who live/congregate together outside of roller derby
 - » Any adjustments to groups should be limited and made at the same time.
- Leagues are expected to **read and abide by the WFTDA Graduated Return to Contact table in the WFTDA Recommendations for Return to Full-Contact Skating:**
 - » Start with a graduated exercise reacclimation period that can be assigned to skaters and officials before returning to skating practice:
 - Light aerobic exercise
 - Cardio exercise
 - Strength exercise
- **Read and follow the WFTDA Infection Control Guidance to ensure participants follow best practices for hand-washing and other hygiene, and to disinfect your facility properly.**

TIER ONE: **League Return with No Contact**

KNOWING WHEN TO STEP BACK DOWN:

BASELINE CONDITIONS

One positive case in your league from an active member, or a member's close contacts (such as a roommate or cohabitant) should always result in the league ceasing activities until the quarantine period recommended by your medical provider has passed, before restarting at Tier One of this ladder.

If your **local government re-institutes social distancing guidelines that limit congregation**, you must step back off the ladder and start again.

STAY AT TIER ONE

A 7-day increase trend in your league's locality's metrics used at baseline should result in a pause at TIER ONE, with no contact and continued adherence to government guidelines.

KNOWING WHEN YOU MAY STEP UP TO THE NEXT TIER:

League participates without contact for 14-day intervals, all the baseline conditions for TIER ONE remain in place, government, sporting and health authorities allow for contact sports, where specified »

TIER TWO: **League Restarts Contact Drills**

These are localized recommendations that apply for any locality in which a skater or official lives and participates. This tier allows for leagues to begin contact drills, but not full scrimmages.

TIER TWO: **Policy Recommendations**

- **Continue to follow policy recommendations as listed in TIER ONE (page 9)**

TIER TWO: **Activity Recommendations**

- **Continue to follow activity recommendations as listed in TIER ONE (page 9)**
- In addition to the TIER ONE activities from the WFTDA Recommendations for Return to Full-Contact Skating, **you may participate in low contact training drills.**

TIER TWO: **League Restarts Contact Drills**

KNOWING WHEN TO STEP BACK DOWN:

BASELINE CONDITIONS

One positive case in your league from an active member, or a member's close contacts (such as a roommate or cohabitant) should always result in the league ceasing activities until the quarantine period recommended by your medical provider has passed, before restarting at TIER ONE of this ladder.

If your local government re-institutes social distancing guidelines that limit congregation, you must step back off the ladder and start again.

RETURN TO TIER ONE

A 7-day increase trend in your league's locality's metrics used at baseline should result in a return to TIER ONE, with no contact and continued adherence to government guidelines.

KNOWING WHEN YOU MAY STEP UP TO THE NEXT TIER:

League participates in low-contact drills for 14-day intervals, all the baseline conditions for TIER ONE remain in place, and no 7-day increase trend in metrics in your locality; you may progress to TIER THREE »

TIER THREE: **League-only Scrimmage and Full Contact**

These are localized recommendations that apply for any geographic locality in which a skater or official lives and participates. This tier allows for full scrimmages, including full officiating staff, but activities are limited to within the league itself and only for those participating in the activity.

TIER THREE: **Policy Recommendations**

- **Continue to follow policy recommendations as listed in TIER ONE (page 9)**

TIER THREE: **Activity Recommendations**

- **Continue to follow activity recommendations as listed in TIER ONE (page 9)**
- In addition to the TIER ONE and TWO activities from the WFTDA Recommendations for Return to Full-Contact Skating, **you may participate in full-contact training and scrimmage drills.**

TIER THREE: **League-only Scrimmage and Full Contact**

KNOWING WHEN TO STEP BACK DOWN:

BASELINE CONDITIONS

One positive case in your league from an active member, or a member's close contacts (such as a roommate or cohabitant) should always result in the league ceasing activities until the quarantine period recommended by your medical provider has passed, before restarting at TIER ONE of this ladder.

If your **local government re-institutes social distancing guidelines that limit congregation**, you must step back off the ladder and start again.

RETURN TO TIER ONE

A 7-day increase trend in your league's locality's metrics used at baseline should result in a return to TIER ONE, with no contact and continued adherence to government guidelines.

KNOWING WHEN YOU MAY STEP UP TO THE NEXT TIER:

League participates in full-contact and scrimmage drills for 14-day intervals, all the baseline conditions for TIER ONE remain in place, and no 7-day increase trend in metrics in your locality; you may progress to TIER FOUR »

SECTION TWO: Return to Inter-league Game Play

RETURN-TO-DERBY LADDER

TIER FOUR

Inter-league game play represents an important step in the Return-to-Play Ladder, and it must be contemplated carefully and attempted with care, with risk of COVID-19 infections in mind. The WFTDA recommends integrating this step slowly, and for many leagues, this step may take some time to attempt. We recommend using 14-day waiting periods following these games, as they represent an expansion of your contact circle, potentially widening the risk of infection.

- The WFTDA will not charge a late fee for rescheduling an event within 30 days if a game must be rescheduled after a 14-day waiting period.
- The WFTDA will not consider a communicated game cancellation due to a COVID-19 outbreak to be a forfeit.

BASIC PROVISIONS FOR **Return to Inter-league Game Play:**

All Baseline Conditions (page 7) continue to be met and your league has successfully passed through 14-day intervals of TIERS ONE-THREE.

These games may be **sanctioned but should be limited to single games or smaller multi-game events** to limit congregation.

The league may **participate in games with other leagues**, but those leagues should be **within the same region** as defined as:

No audiences recommended per WFTDA's Statement on Audiences and Roller Derby.

- **a city, state/province, or multi-city/state/province locality within reasonable geographic proximity of the league; WITHIN THE SAME COUNTRY; AND**
- **sharing coordinated or similar COVID timing and response between health and governmental entities.**

When ALL OF THESE BASIC PROVISIONS have been met, your league is ready to advance to TIER FOUR »

TIER FOUR: Return to Inter-League Game Play in Region

These are localized recommendations that apply for any geographic area in which a skater or official lives and participates. This tier allows for inter-league regulation and sanctioned games to resume, but only within the localized region of the league—for example, a county or small state—within the same country, and with no audiences.

TIER FOUR: Policy Recommendations

- **Continue to follow policy recommendations as listed in TIER ONE (page 9)**
- **Speak openly to any opposing teams**, and recognize that the goal is to avoid active infections.
- To minimize the economic impact of a cancellation for health reasons, **work with a lawyer to:**
 - » **Structure your inter-league agreements to avoid penalizing cancellations**
 - » **Set up venue contracts that allow for flexibility in case of COVID resurgence in your locality or in case a participating league has a resurgence in their locality.**

TIER FOUR: Activity Recommendations

- **Continue to consider capping participants** in order to limit exposure when inter-league play resumes;
- **Read and abide by the WFTDA Graduated Return to Contact table** in the WFTDA Recommendations for Return to Full-Contact Skating. In addition to the TIER ONE through THREE activities, you may participate in:
 - » **Full Game Play**
- **Review the WFTDA Infection Control Guidance to ensure all participants follow best practices for hygiene, and your facility is disinfected properly to prevent the spread of infection.**

TIER FOUR: Return to Inter-League Game Play in Region

KNOWING WHEN TO STEP BACK DOWN:

BASELINE CONDITIONS

One positive case in your league from an active member, or a member's close contacts (such as a roommate or cohabitant) should always result in the league ceasing activities until the quarantine period recommended by your medical provider has passed, before restarting at TIER ONE of this ladder. New positive cases in your league or game participants, such as officials, should also result in a pause in travel.

If your **local government re-institutes social distancing guidelines that limit congregation**, you must step back off the ladder and start again.

RETURN TO TIER ONE

A 7-day increase trend in your league's locality's metrics used at baseline should result in a return to TIER ONE, with no contact and continued adherence to government guidelines.

REMAIN AT TIER FOUR

New positive cases outside your league that don't indicate a 7-day increase for Return to TIER ONE should mean a halt at TIER FOUR to assess the safety of continued play outside your league.

KNOWING WHEN YOU MAY STEP UP TO THE NEXT TIER:

- League participates in regional game play with other leagues for 14-day intervals.
- No new cases appear in your region.
- Full travel is appropriate and allowable in your region without quarantine or other restrictions.
- Testing and contact tracing programs are available in the region of origin of any team or participant in the event.

SECTION THREE: Graduated Return to Travel and Small Events

RETURN-TO-DERBY LADDER

TIER FIVE

SECTION THREE allows for travel outside of a league's region for the purpose of game play and is split into three tiers in order to assess the risk of:

- Travel distance - moving from short-haul travel to long-haul/international travel including travel restrictions, closed borders and quarantine requirements
- Medical advances and practices in participating regions
- Impact of the above on the safety of allowing audience participation in the event

BASIC PROVISIONS FOR **Return to Domestic Gameplay (Small Events):**

Testing and contact tracing programs are available in the region of origin of any team or participant in the event.

Leagues may **travel outside of their region, as defined above in TIER FOUR**, to participate with leagues of another region of their country as long as each region is similar in terms of COVID timing and response by health and governmental entities.

Games may be sanctioned and should be limited to single games or smaller multi-game events.

Small live audiences are possible.
(WFTDA audience guidelines will be forthcoming.)

When **ALL OF THESE BASIC PROVISIONS** have been met, your league is ready to advance to **TIER FIVE »**

TIER FIVE: **Return to Domestic Gameplay (Small Events)**

These are recommendations that apply for short-haul domestic travel outside of the local region as defined by your league in Tier Four, but not across a large country or an international border, and with small audiences. (WFTDA audience guidelines will be forthcoming.)

TIER FIVE: **Policy Recommendations**

- **Continue Policy Recommendations for TIER FOUR (page 14)**
- **Consider purchasing travel insurance for your league members** when travel is possible, to allow for cancellation should your league be affected by a new outbreak.
 - » Be sure to check for policy exclusions and read the policy terms carefully, prior to purchasing. **Not all travel policies include pandemic coverage.**

TIER FIVE: **Activity Recommendations**

- **Continue to follow the WFTDA Infection Control Guidance to ensure participants follow best practices in travel and at play, and your facility is disinfected properly to prevent the spread of infection.**

TIER FIVE: Return to Domestic Gameplay (Small Events)

KNOWING WHEN TO STEP BACK DOWN:

BASELINE CONDITIONS

One positive case in your league from an active member, or a member's close contacts (such as a roommate or cohabitant) should always result in the league ceasing activities until the quarantine period recommended by your medical provider has passed, before restarting at Tier One of this ladder. New positive cases in your league or game participants, such as officials, should also result in a pause in travel.

If your **local government re-institutes social distancing guidelines that limit congregation**, you must step back off the ladder and start again.

RETURN TO TIER THREE

A 7-day increase trend in your league's locality's metrics used at baseline should result in a return to Tier Three, after which leagues will monitor conditions for next steps.

REMAIN AT TIER FIVE

New positive cases outside your league that don't indicate a 7-day increase for Return to TIER ONE should mean a halt at TIER FIVE to assess the safety of continued play outside your league.

POSTPONEMENT

Increasing 7-day trends in the region to which you wish to travel, and/or new government distancing guidance in that region, should result in the game being postponed.

KNOWING WHEN YOU MAY STEP UP TO THE NEXT TIER:

- League participates in short-haul, domestic game play only for 14-day intervals.
- Medical advances such as antibody testing (with confirmed immunity of a recognized duration), or therapeutics to either help prevent or significantly reduce the impact of the virus are widely available through the health care system.
- Long-haul and/or international travel is appropriate and allowable in your region/country and your destination region/country without quarantine or other restrictions.

BASIC PROVISIONS FOR Return to Long-Haul and International Gameplay (Small Events):

Leagues may engage in long-haul travel including crossing international borders.

Games may be sanctioned but should be limited to single games or smaller multi-game events.

Small live audiences are possible. (WFTDA audience guidelines will be forthcoming.)

When ALL OF THESE BASIC PROVISIONS have been met, your league is ready to advance to TIER SIX»

TIER SIX: **Return to Long-Haul and International Gameplay (Small Events)**

These are recommendations that allow for leagues to take longer distance trips to compete, including crossing national borders to participate. This tier allows for all domestic and limited international travel, but for only smaller tournament events and small audiences.

TIER SIX: **Policy Recommendations**

- **Continue Policy Recommendations for TIER FIVE (page 19)**

TIER SIX: **Activity Recommendations**

- **Continue to follow the WFTDA Infection Control Guidance to ensure participants follow best practices for hygiene at travel and in play, and your facility is disinfected properly to prevent the spread of infection.**

TIER SIX: Return to Long-Haul and International Gameplay (Small Events)

KNOWING WHEN TO STEP BACK DOWN:

BASELINE CONDITIONS

One positive case in your league from an active member, or a member's close contacts (such as a roommate or cohabitant) should always result in the league ceasing activities until the quarantine period recommended by your medical provider has passed, before restarting at TIER ONE of this ladder. New positive cases in your league or game participants, such as officials, should also result in a pause in travel.

If your **local government re-institutes social distancing guidelines that limit congregation**, you must step back off the ladder and start again.

RETURN TO TIER THREE

A 7-day increase trend in your league's locality's metrics used at baseline should result in a return to TIER THREE, after which leagues will monitor conditions for next steps.

REMAIN AT TIER SIX

New positive cases outside your league that don't indicate a 7-day increase for Return to TIER ONE should mean a halt at TIER SIX to assess the safety of continued play outside your league.

POSTPONEMENT

Increasing 7-day trends in the region to which you wish to travel, and/or new government distancing guidance in that region, should result in the game being postponed.

KNOWING WHEN YOU MAY STEP UP TO THE NEXT TIER:

- League participates in longer distance game play only for 14-day intervals.
- See the Baseline Conditions for TIER SEVEN to ensure they are in place before planning events that are allowable under that tier.

SECTION FOUR: Return to Large-scale Events

RETURN-TO-DERBY LADDER

TIER SEVEN

SECTION FOUR allows for unlimited travel for game play, large-scale events and audiences. WFTDA feels that our sport will only be able to return to this level of participation with the existence of commercially available vaccines. Should WFTDA determine that existing testing, contact tracing and therapeutic medications make it possible for audiences to attend safely, this requirement may be waived.

WFTDA encourages a culture of protecting each other through each of our individual actions. WFTDA does not require proof of vaccinations to participate and will discuss any recommendations surrounding COVID vaccination with our membership prior to reaching this Tier.

Events hosting audiences must be extra careful to monitor the status of infection throughout the world to avoid travel-spread transmission to your participants and region via your event.

BASIC PROVISIONS FOR **Return to Full-Scale Events with Spectators:**

 **No travel restrictions in all WFTDA regions, unless otherwise determined by the WFTDA Board of Directors.**

 **No limit to the size of the event or number of participants and spectators.**

 **WFTDA returns to full global competitive pathways and events.**

When ALL OF THESE BASIC PROVISIONS have been met, your league is ready to advance to TIER SEVEN »

TIER SEVEN: **Return to Full-Scale Events with Spectators**

TIER SEVEN: **Policy Recommendations**

- **Continue Policy Recommendations for TIER FIVE (page 19).**
- **Even though a vaccine is available, the league should always run an attendance policy that allows for participants to miss events when ill or suspecting illness.**

TIER SEVEN: **Activity Recommendations**

- **Continue to follow the WFTDA Infection Control Guidance to ensure participants follow best practices for hygiene in travel and at play, and your facility is disinfected properly to prevent the spread of infection.**

TIER SEVEN: **Return to Full-Scale Events with Spectators**

KNOWING WHEN TO STEP BACK DOWN:

BASELINE CONDITIONS

One positive case in your league from an active member, or a member's close contacts (such as a roommate or cohabitant) should always result in the league ceasing activities until the quarantine period recommended by your medical provider has passed, before restarting at TIER ONE of this ladder.

If your local government re-institutes social distancing guidelines that limit congregation, you must step back off the ladder and start again.

RETURN TO TIER THREE

A 7-day increase trend in your league's locality's metrics used at baseline should result in a return to TIER THREE, after which leagues will monitor conditions for next steps.

REMAIN AT TIER SEVEN

New positive cases outside your league that don't indicate a 7-day increase for Return to TIER ONE should mean a halt at TIER SEVEN to assess the safety of continued play outside your league.

POSTPONEMENT

Increasing 7-day trends in the region to which you wish to travel, and/or new government distancing guidance in that region, should result in the game being postponed.
